**FOR IMMEDIATE RELEASE**

## IMCORP Celebrates 18 Years of Setting the Standard for Power Cable Reliability

*IMCORP announces its 18<sup>th</sup> anniversary. From University of Connecticut startup to industry leader in power cable assessment, IMCORP's unprecedented growth has set the standard in the power cable reliability industry.*

MANCHESTER, CT 8/12/2013: IMCORP, the global provider of the Factory Grade<sup>SM</sup> test for power cable systems, is proudly celebrating 18 years of successful business.

Founded in 1995 as a startup out of the University of Connecticut, IMCORP has developed into the leading provider of power cable reliability services. Unmatched diagnostic performance has fueled a 45% increase in employees over the past year alone. IMCORP has expanded its reliability services to clients in 49 U.S. states and 15 countries. IMCORP now stands as the premier cable reliability company in North America for utility, renewable energy, and facility clients.

Company associates celebrated at the IMCORP headquarters in Manchester, CT. IMCORP President Bruce expressed his gratitude by saying, "The consistent double digit growth of IMCORP after eighteen years in business can be attributed to a culture based on solution innovation and passion for client success."

IMCORP looks forward to the future, with millions of miles of cable to test and continued unprecedented growth. IMCORP's impact on the local economy, global ecology, and quality of life for all those who depend on power is a source of pride for its associates.

### **About IMCORP:**

IMCORP is the technology leader in underground power cable reliability. Our diagnostic technology locates existing cable system defects and predicts future cable reliability. This performance-driven solution provides the most effective and efficient means to determine the reliability of new or aged cable systems. IMCORP's Factory Grade<sup>SM</sup> test, bringing the cable and accessory manufacturers quality standards to the field, has enabled rapid growth across industries and around the world. From single phase 5kV to 3 phase 500kV, IMCORP is setting the standard in cable system reliability.
